

## SecuraGold™ is a tried and proven performer in hot and cold water piping systems

### Other applications for SecuraGold™

The unique characteristics of the SecuraGold™ piping system make it suited to a wide and varied range of applications other than for hot and cold water:

- ✓ Re-circulating systems
- ✓ High temperature pipelines
- ✓ High pressure pipelines
- ✓ HVAC piping
- ✓ Secondary refrigeration pipelines
- ✓ Chilled water and ice slurry lines
- ✓ Compressed air lines
- ✓ Medical gas lines
- ✓ Chemical transfer piping
- ✓ Mobile home piping

Note: Prior to using SecuraGold™ for other than hot and cold water applications the approval of the Dux technical department is recommended

### Material, manufacturing and performance certified

SecuraGold™ fittings and Polybutene-1 pipes meet all material and performance requirements of AS/NZS 2462 parts 1 and 2 and are produced under current Watermark Licence No. 1289 CL16.

### What's the real cost?

Independent testing compared the installation time of Dux SecuraGold™ versus a number of trade hot & cold piping systems.

In residential applications, labour may make up a larger percentage of business costs than materials, so installation time is an important factor to consider to improve efficiencies.

Below is a comparison of average installation times in minutes of SecuraGold™ (PB-1) versus one system - Rifeng Crimp (PEX), based on multiple installations in testing, and with timings corrected to take into account installer speeds.

	SecuraGold™	Rifeng	% Faster
Average Install Minutes	24.30	42.24	74%

**So ask yourself – what's the real cost to your business using your current piping system?**

To view the installation videos and find out more about the project visit [www.dux.co.nz/whats-real-cost](http://www.dux.co.nz/whats-real-cost)

### Producer Statement

hard copies available from your Dux TM

The SecuraGold™ system fully complies with the Australian and New Zealand Standard AS/NZS 2462 Parts 2 and 3 and is Standards Licence No. 1289 CL16.

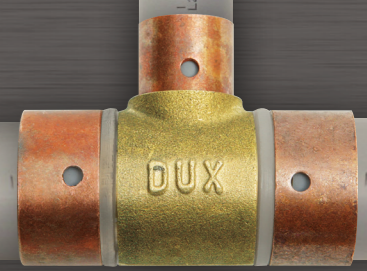

The system must be installed to the requirements of AS/NZ 3500 1.2:1998 and AS/NZ 3500 4.2:1997.

The DZR (Dezincification resistant) brass is tested independently to AS 1545-2006

## SecuraGold™ the trade professional's choice

SecuraGold™ is the choice among professional plumbers and specifiers. The simple design and proven use of high performance materials delivers long term results that can be relied on.

Combine this with fast installation, no fuss jointing, great flexibility, adaptability and lower installation costs, SecuraGold™ is unbeatable.

All SecuraGold™ fittings are supplied fully assembled with all components and are ready to install. Simply cut the pipe, insert the fitting, crimp. Job done. It's that easy.

## More features - more benefits

### SECURAGOLD™ REDUCES OVERALL INSTALLATION COSTS

Long pipe lengths are easily and quickly threaded through the building with less joints required

### NO MORE 'BIRDS NESTS'

Secura 'lay straight' coiled pipe behaves like straight pipe when uncoiled. Handling, installation and storing is easier and helps to reduce waste

### HIGH FLOW RATES

Large smooth internal pipe bore delivers more volume size for size with no scale build up

### RELIABLE JOINTING

Proven worldwide, crimp jointing is simple and effective and provides long-term reliability

### EASY CRIMPING

SecuraGold™ crimp tools are compact and easy to use anywhere at anytime

### NO EXTRA PARTS OR TOOLS REQUIRED

SecuraGold™ fittings are pre-assembled ready for installation, simply cut, insert the pipe and crimp

### ENVIRONMENTALLY FRIENDLY

Production of Polybutene-1 uses fewer resources than other materials. The entire system is 100% recyclable and is not harmful if subjected to extreme temperatures

### LONG LIFE

Being able to operate at consistently higher temperatures and pressures for longer enables SecuraGold™ to last decades

### VERSATILE AND ADAPTABLE

Wide and varied range of applications and easily adapted to other pipe systems without induced corrosion

### FOOD SAFE

No leaching or tainting the taste and smell of your water supply

### EYE-SPY HOLES

All SecuraGold™ crimp rings feature an eye-spy hole for a quick visual check to ensure pipe has been inserted correctly into the fitting

### LOW HEAT LOSS

As a poor conductor, water stays hotter / cooler for longer without the need for insulation

### REDUCED NOISE

Water hammer and hydraulic noises are better absorbed, making the system very quiet

### FLEXIBILITY

Easy to flex and thread through structures in long lengths

### EXTENSIVE RANGE

With 4 size diameters this is an extensive system for large and small projects

### SAFER TO INSTALL

Health and safety of plumber and building is never compromised as no dangerous solvents, electricity or hot welding equipment is needed

### HARD WATER RESISTANT

All SecuraGold™ fittings are full DZR Brass to maintain integrity

### PROTECTION FROM FOREIGN OBJECTS

Fittings have an end cap to protect the fitting from foreign objects

### SECURAGOLD™ PROVIDES A 25 YEAR SYSTEM WARRANTY (LIMITED)
