# BUGATTI

HIGH QUALITY BALL VALVES

## FROST FREE RANGE

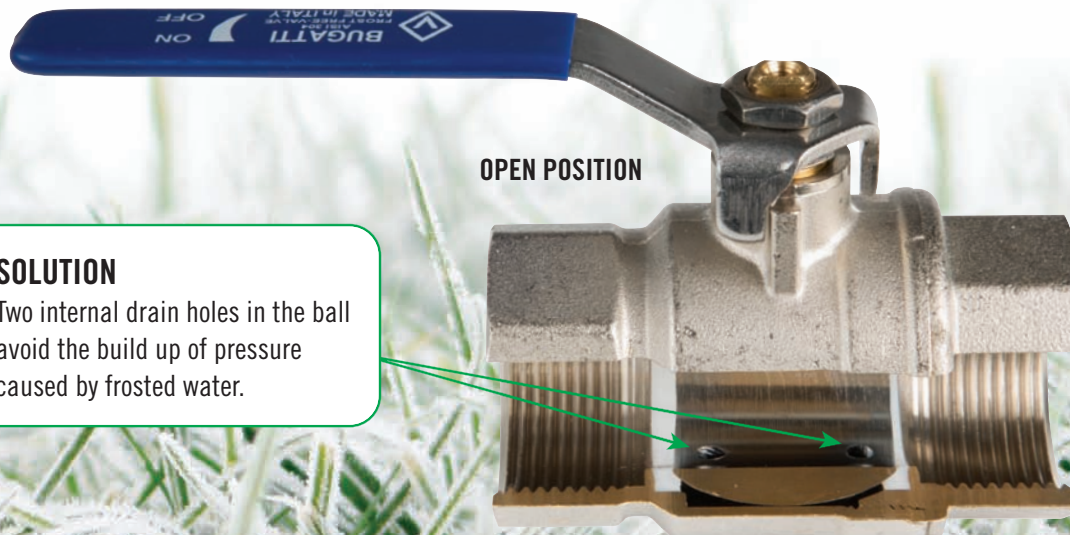

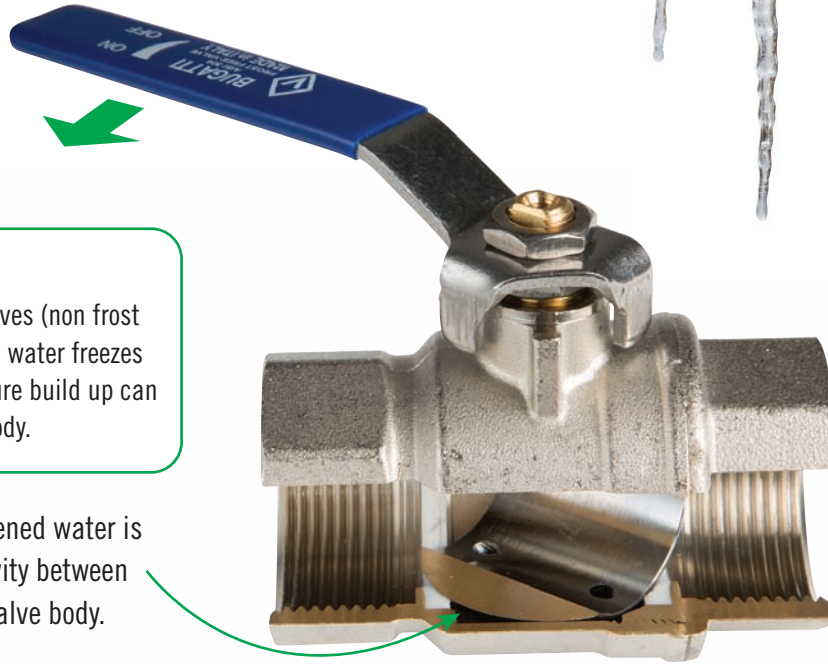

### OTHER FEATURES

- 1 Long stainless steel handle
- 2 Nickel plated brass body
- 3 Long thread
- 4 ISO 7:2000
- 5 Quality Italian made valve
- 6 Meets European standards
- 7 Temperature range -20°C to 120°C

#### PROBLEM

In standard ball valves (non frost free) as the trapped water freezes the resulting pressure build up can rupture the valve body.

As the valve is opened water is trapped in the cavity between the ball and the valve body.

#### SOLUTION

Two internal drain holes in the ball avoid the build up of pressure caused by frosted water.
