

Marley Typhoon Half Round Spouting

- it's taking New Zealand by storm!

Internal Brackets

External Brackets

TYPHOON

The new Marley Typhoon half round spouting system is designed specifically for New Zealand homes and conditions. Its contemporary design offers a choice of either internal brackets (for a clean finish) or external brackets (for a unique look and ease of cleaning).

 **MARLEY**

Typhoon solvent assembly spouting system

Typhoon is a half round spouting system designed specifically for New Zealand homes and conditions. This contemporary design offers a choice of either internal or external brackets.

New from Marley

Typhoon half-round spouting is a new addition to the range of Marley PVC spouting systems. Suitable for new and existing homes.

A Choice of Styles

The Marley Typhoon spouting system's profile has a high front. This helps hide untidy rooflines and provides a very neat end result. Marley Typhoon also has an internal and external bracketing option. Choose internal bracketing if you require a smooth, clean finish that is easy to paint. External bracketing gives the spouting a completely different look. The visible brackets become a design feature. External brackets also make the inside of the spouting easier to clean.

Easy-Flow Design

Marley Typhoon half-round spouting provides a large water capacity of 6100mm². This delivers a better rate of water flow, which enables it to cope better with sudden downpours, as well as decreasing the likelihood of leaf and sediment build-up. This is of particular benefit if the spouting is being used to collect rainwater for household use.

Tough and Long-Lasting

Marley Typhoon spouting is manufactured from PVC. It is an extremely tough and long-lasting material that will not rust, requires little maintenance and is UV resistant.

All Typhoon components come with a 15-year guarantee.

Easy to Install

The Typhoon half-round spouting system is a solvent-jointed system that requires no special tools. It is compatible with all Marley downpipe and rain harvesting systems and comes with a complete range of fittings including a dropper concept for use when a rainhead is not suitable.

Instructions are On-Line

For the complete installation instructions click on 'Rainwater' on the Home Page of www.marley.co.nz and then select Marley Spouting Systems Installation Guide.
