

TYPHOON SPOUTING SYSTEM

Typhoon is a half round spouting system designed specifically for New Zealand homes and conditions. This contemporary design offers a choice of either internal or external brackets.

80MM ROUND DOWNPIPE SYSTEM

80mm round downpipes are well suited to most houses and buildings and can be used when subjected to head pressure eg. connected to water tanks.

Note: Round downpipes must not be used in wall or ceiling cavities.

Flexipak Customised Ordering Service

Get exactly what you want! Now you can order rainwater products in the exact quantities you want, ready within 48 hours with Flexipak™, the new Custom Ordering Service.

How it works

1. Place an order for any Flexipak products.
2. Your order will be ready within 48 hours.
3. A full range of accessories complement all Flexipak products.
